IFTIKHAR AHMED

Uttara, Dhaka, Bangladesh +8801533133309 ifti3061@gmail.com iftikhar-ahmed
NinjaIfti iftikharahmed.site

Software Engineer with hands-on industry experience in web and mobile application development, specializing in scalable backend systems and fintech solutions. Skilled in Laravel, Flutter, Kotlin, and modern web technologies, with a strong focus on performance optimization and user-centric design. Founding Member and CTO of Poraghor, a Bangla-first AI learning startup. First author of a paper on adversarial defense for audio deepfake detection, published on IEEE Xplore (ICMLT 2026). Delivered production platforms for clients in the USA, Sierra Leone, Bhutan, and Bangladesh, spanning permitting, e-commerce, digital wallets, eSIM, and logistics.

Education

North South University Dhaka, Bangladesh
Bachelor of Science in Computer Science and Engineering ***(CGPA: 3.07/4.00)*** ***2021 – 2026***

Dr. Mahbubur Rahman Mollah College Dhaka, Bangladesh
Higher Secondary Certificate, Science ***(GPA: 4.80/5.00)*** ***2020***

Narayanganj Ideal School Narayanganj, Bangladesh
Secondary School Certificate, Science ***(GPA: 4.93/5.00)*** ***2018***

Experience

Poraghor (EdTech Startup), Dhaka, Bangladesh *Founding Member & CTO (Aug 2026 – Present)*

- Lead the technology and architecture of Poraghor, a Bangla-first, AI-native learning platform for SSC students, built with Laravel, Inertia, Vue 3, a Flutter mobile app, and Firebase.
- Designed the AI Doubt Solver: students type or photograph a question and get a step-by-step Bangla answer grounded in the NCTB textbook, citing the chapter and page.
- Built a teacher-verified question bank that serves verified answers at no AI cost and routes new AI answers to a teacher review queue, so the bank grows from real student demand.
- Planned and delivered the product in phases, including student accounts with OTP verification, the AI tutor, and test papers, on a Filament admin panel.

1Contractor Solutions, Florida, USA *Associate Software Developer, Full Stack (May 2024 – Nov 2025)*

- Developed a full-featured permitting web application in Laravel and SQL, supporting end-to-end online permitting and license operations.
- Designed and built a custom admin panel for managing permits, court orders, and county orders.
- Implemented stored procedures, cursors, functions, and triggers for efficient data management, and built real-time messaging for document approval.
- Managed the existing website and migrated its data to the new system.
- Deployed the application on DigitalOcean and provided 6 months of maintenance and support, resolving IT tickets within SLAs.

Fiverr & Direct Clients, Remote *Freelance Full-Stack Web & Mobile Developer (2024 – Present)*

- Built ExpresBuy, a multi-vendor marketplace for Sierra Leone with mobile money payments, seller memberships, boosted ads, SMS OTP sign-in, and a companion Flutter app on the Play Store.
- Developed Nomiqa, a DePIN eSIM app in React and TypeScript, wrapped with Capacitor for Android and iOS and backed by Supabase, with biometric authentication and push notifications.
- Built the WemaPay digital wallet, a Flutter app on the Play Store and App Store with QR payments, wallet top-ups, and airtime and utility bill payments.
- Built the ticketing and registration platform for the UNDP Global Conscious Food Systems Summit in Bhutan, serving 350 to 500 delegates.
- Built Nannimo, a social companionship app for Android and iOS (Capacitor, Supabase), and Camel Crossing, a Flutter wrapper that runs a 3D HTML5 game offline with AdMob rewarded ads.

- Built AccountZ, a digital accounts marketplace in Laravel with wallet deposits, reseller API keys, and live order fulfillment from supplier APIs.
- Delivered logistics, print management, matchmaking, and e-commerce platforms in Laravel and MySQL for clients in Bangladesh and abroad.

Technical Skills

Frontend: React, Next.js, Vue.js, TypeScript, HTML, CSS, Tailwind CSS, Bootstrap **Backend:** Laravel, Livewire, CodeIgniter, Django, Node.js, Express.js **Mobile:** Flutter, Kotlin, Swift, Capacitor **Databases:** MySQL, PostgreSQL, MongoDB, Supabase **Languages:** Python, PHP, JavaScript, Kotlin, Dart **Machine Learning:** CNNs, YOLOv5, Adversarial Training **Tools:** Git, Android Studio, VS Code, Postman, DigitalOcean **Others:** REST APIs, Rasa (Chatbot Development)

Publications
